Gritting Plan

1. Site Supervisor to assess risk to walking around school site.
2. Site Supervisor to clear snow/break up ice all around the paths on school site, including the drive way on the entrance to school. **This job should precede all others in school so that the site is safe for all to attend school.**
3. Site Manager to thoroughly grit all paths and walkways.
4. Head of School to reassess risk to walking around school site after site has been gritted. Site Supervisor to liaise with Head of School for this.
5. Site Supervisor to ensure there is adequate grit in school and pre-order the term before it is needed, if necessary.
